ACOUSTIC WOOD SUSPENDED CEILINGS
AND WALL CLADDINGS

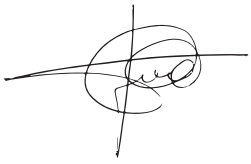
LAUDESCHER

LAUDESCHER

We work to improve people's living environments while respecting nature.

"To us, wood is more than just a material. For over 50 years, it has inspired us to create designs that enhance both architecture and quality of life. From traditional carpentry to technological innovation, Laudescher has developed a unique and renowned industrial base. Driven by a passion for wood and a humanistic vision of our craft, open to the world, we provide professionals with innovative, higher-value solutions. Working alongside these professionals, Laudescher tackles the technical, environmental and economic challenges of contemporary construction. For them, we select high-quality, sustainable resources, advance technologies, and imagine new designs for tomorrow's buildings."

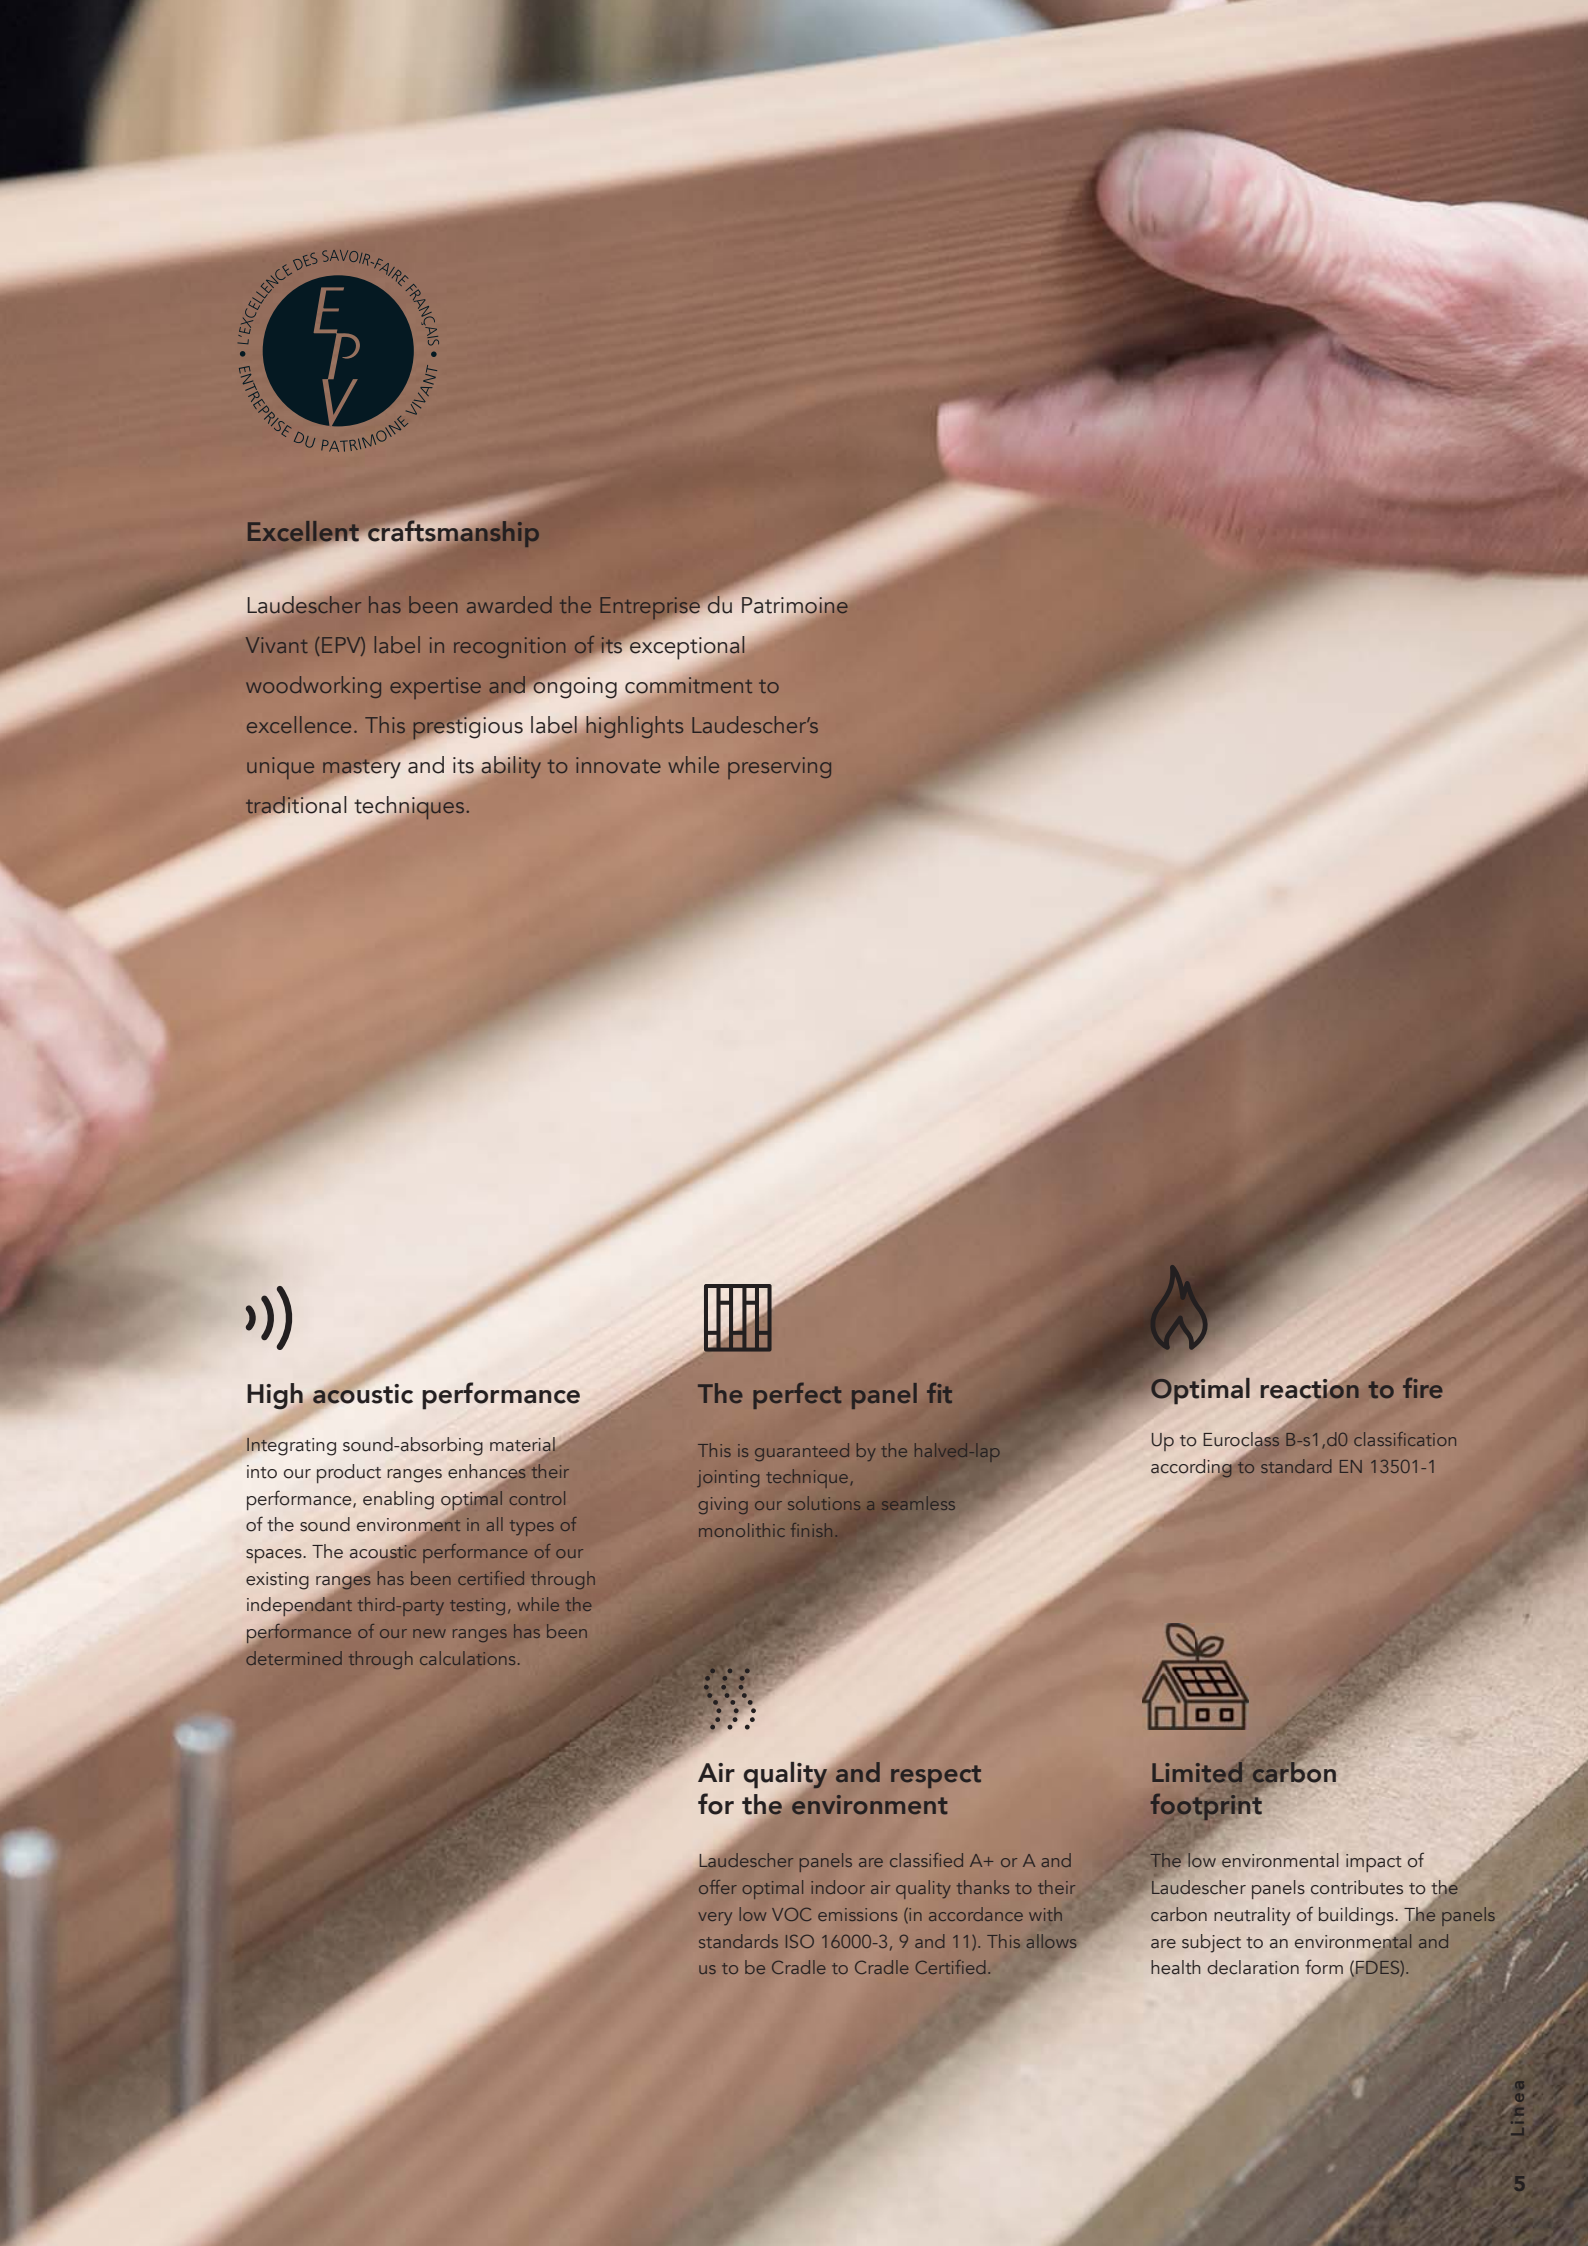
Jean-Marc Laudescher
President



High-performance panels

High acoustic performance

Thanks to Laudescher's expertise, the natural performance of wood is maximised to create resistant products that are certified for reaction to fire and offer excellent environmental and acoustic performance. The absorption and diffusion characteristics of Laudescher panels have been tested and allow you to control the sound environment in any type of space.



Excellent craftsmanship

Laudescher has been awarded the Entreprise du Patrimoine Vivant (EPV) label in recognition of its exceptional woodworking expertise and ongoing commitment to excellence. This prestigious label highlights Laudescher's unique mastery and its ability to innovate while preserving traditional techniques.

High acoustic performance

Integrating sound-absorbing material into our product ranges enhances their performance, enabling optimal control of the sound environment in all types of spaces. The acoustic performance of our existing ranges has been certified through independant third-party testing, while the performance of our new ranges has been determined through calculations.

The perfect panel fit

This is guaranteed by the halved-lap jointing technique,
giving our solutions a seamless monolithic finish.

Optimal reaction to fire

Up to Euroclass B-s1,d0 classification according to standard EN 13501-1

Air quality and respect for the environment

Laudescher panels are classified A+ or A and offer optimal indoor air quality thanks to their very low VOC emissions (in accordance with standards ISO 16000-3, 9 and 11). This allows us to be Cradle to Cradle Certified.

Limited carbon footprint

The low environmental impact of Laudescher panels contributes to the carbon neutrality of buildings. The panels are subject to an environmental and health declaration form (FDES).

Committed and responsible

FOR PEOPLE AND THE ENVIRONMENT

At Laudescher, our approach to wood is integral to our holistic vision, encompassing everything from environmental preservation to fostering healthier living environments.

We have always taken care to minimise our environmental footprint.
The vast majority of our timber comes from sustainably managed forests certified by FSC® and PEFC, both of which guarantee responsible and ethical management.
Our products are designed according to a rigorous eco-design approach, incorporating principles of circularity, material health and low impact throughout their life cycle, and are Cradle to Cradle® Bronze Certified.

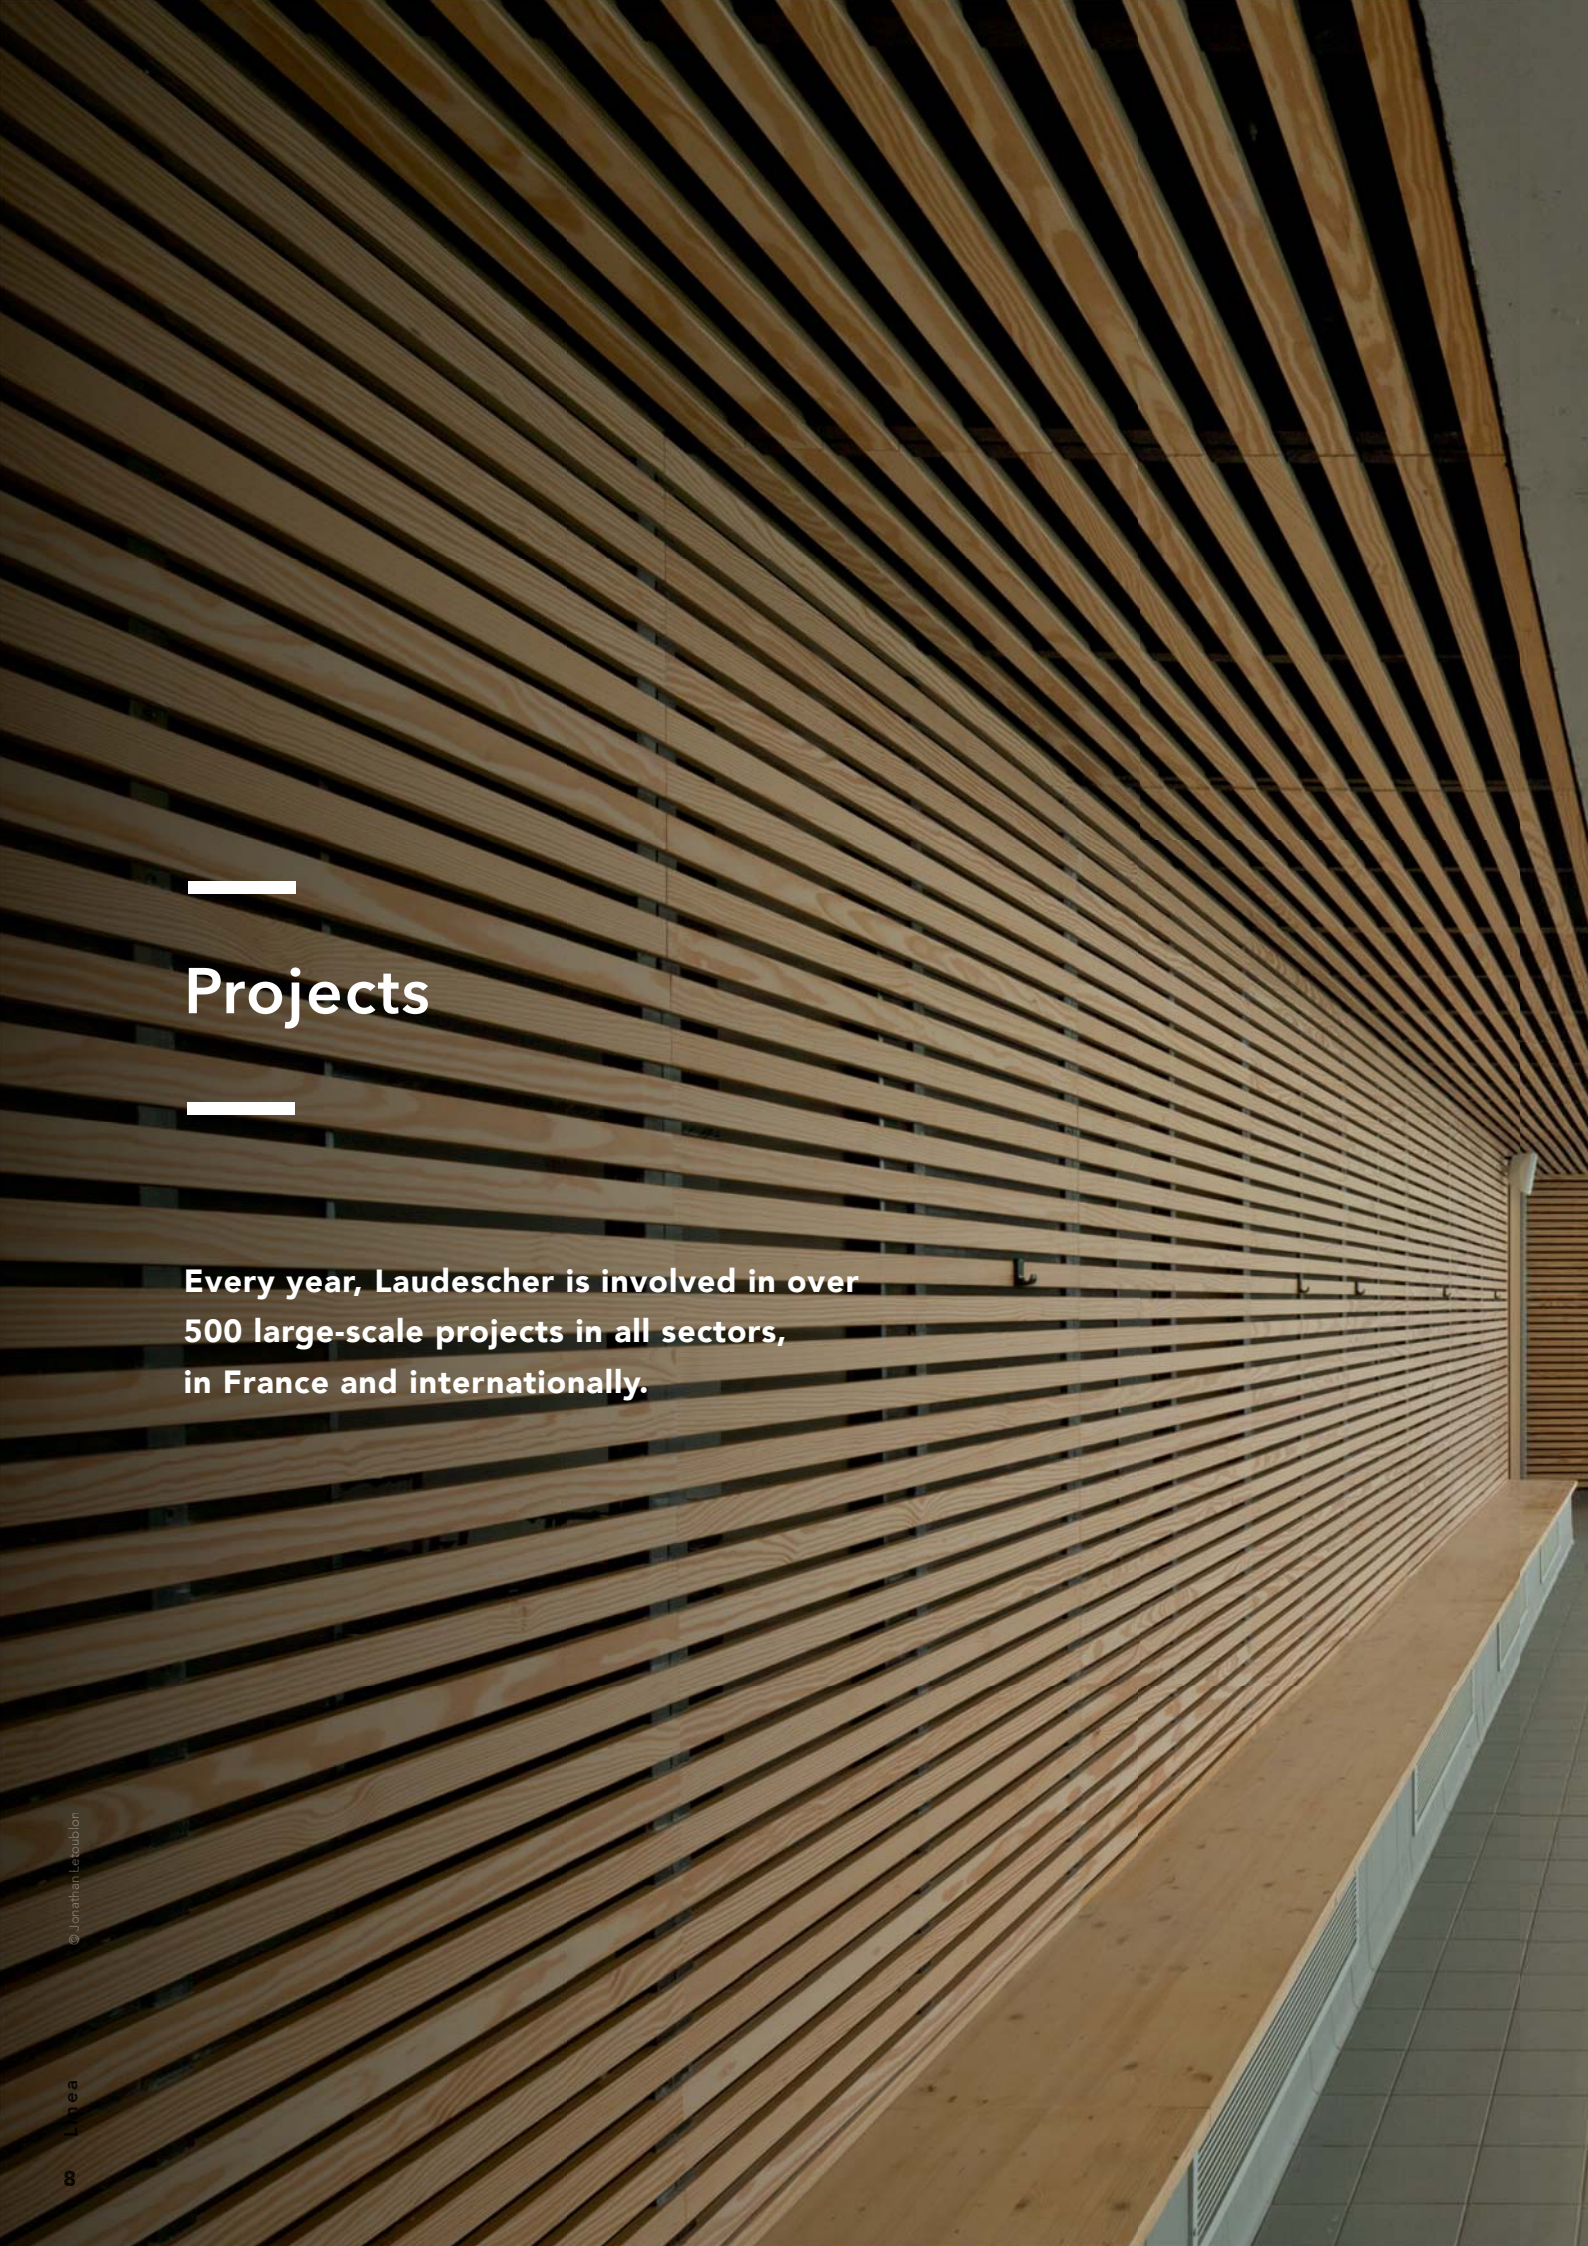
However, our commitment goes beyond certifications.
We aspire to contribute to caring architecture, where every construction choice is an act of responsibility towards the planet. We envision designs that repair, preserve and interact with living things.

Through our acoustic and aesthetic wood solutions, we support architects and construction professionals in creating sustainable, healthy, sensitive spaces that combine technical performance with environmental awareness.

Laudescher's quality approach is certified annually by independent bodies.

ISO **9001** (quality commitment)
FSC®CERTIFICATION - FSC® NO. C125874
PEFC CERTIFICATION - PEFC NO./10-31-2391
(sustainable forest management)
CE marking

All our wood is rigorously selected to ensure the quality of our finished products (dry timber 10 to 12%, first choice).



Projects

Every year, Laudescher is involved in over 500 large-scale projects in all sectors, in France and internationally.

The Linea ranges

Beyond its intrinsic aesthetic qualities, wood helps to recreate an enveloping atmosphere firmly rooted in a particular place and time.
Suitable for both modern and more traditional settings, Linea panels provide excellent acoustic comfort and undeniable visual appeal.
Available in a variety of timber species and finishes, they allow spaces to be personalised to create unique, sensitive and harmonious atmospheres where materials, light and acoustics interact subtly.

Slat spacing	60 mm
Centre distance of slats:	150 mm
Black rear counter-slats	34 x 45 mm
Total thickness	55 mm
Timber species	Silver fir, pine, oak
Area density, silver fir	7.4 kg/m²
Area density, pine	9.9 kg/m²
Area density, oak	11.6 kg/m²
Openness percentage	40%

Back: rigid acoustic rockwool tiles (2.4 kg/m²), covered with black fleece finish (size: 600 x 600 mm; thickness: 20 or 22 mm).
Not supplied by Laudescher.

REACTION TO FIRE (IN ACCORDANCE WITH EN 13501-1)

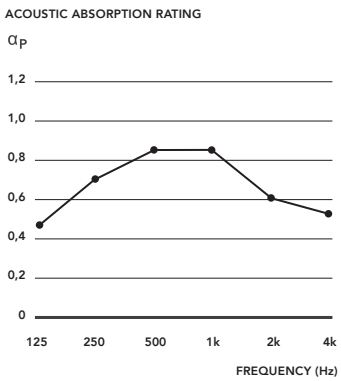
Fire-retardant, Euroclass standard B-s1, d0 or B-s2, d0 depending on the type of wood and finish.

ACOUSTIC PERFORMANCE

Various items of sound absorption data (αp, αw, absorption class) have been calculated in accordance with standard ISO 11654 (Linea + acoustic complement).

LINEA 9.2.6 CEILING

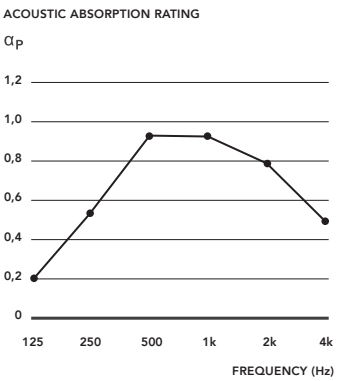
+ 20 mm rockwool on E250 mm plenum



WEIGHTED INDEX:	ABSORPTION CLASS:
α_w = 0.65	Class C

LINEA 9.2.6 WALL

+ 20 mm rockwool on plenum E50 mm



WEIGHTED INDEX:	ABSORPTION CLASS:
α_w = 0.70	Class C

The sound absorption has been measured in accordance with standard ISO 354.

INSTALLATION:
In accordance with NF EN 14915
In accordance with DTU 36-2

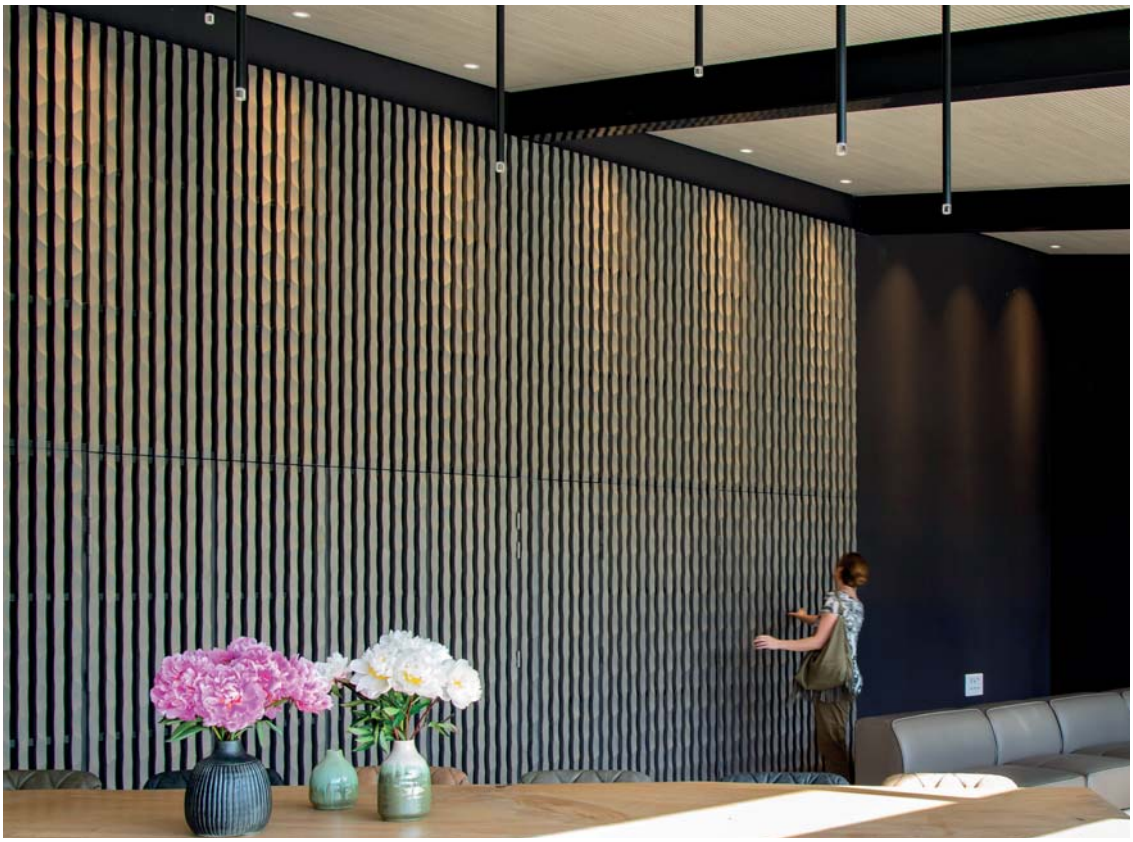
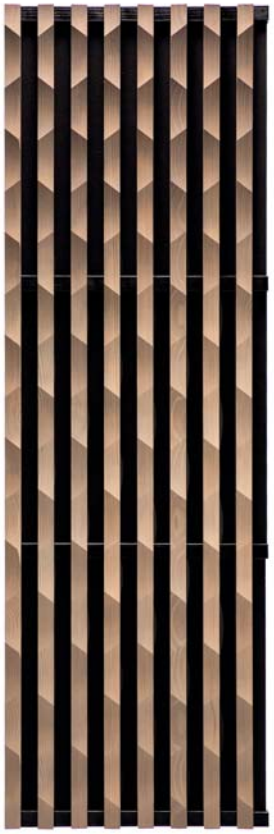
Champagne Vilmart house - APRIM Architecture



TECHNICAL SPECIFICATIONS

Panel dimensions	2,495 x 600 mm (screw-on only) 1,880 x 600 mm 1265 x 600 mm
Slat cross-section	40 mm (front) x 40 mm (height)
Slat spacing	35 mm
Centre distance of slats:	75 mm
Black rear counter-slats	34 x 45 mm
Total thickness	67 mm
Timber species	Pine, oak
Area density, pine	13.2 kg/m²
Area density, oak	15.2 kg/m²
Openness percentage	47%

Back: rigid acoustic rockwool tiles (2.4 kg/m²), covered with black fleece finish (size: 600 x 600 mm; thickness: 20 or 22 mm).
Not supplied by Laudescher.



REACTION TO FIRE (IN ACCORDANCE WITH EN 13501-1)

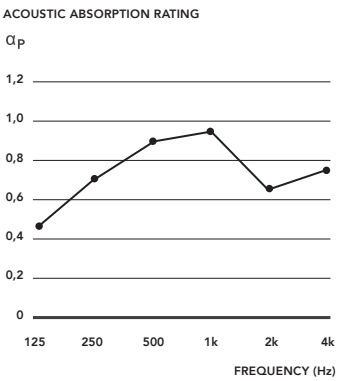
Fire-retardant, Euroclass standard B-s1, d0 or B-s2, d0 depending on the type of wood and finish.

ACOUSTIC PERFORMANCE

Various items of sound absorption data (αp, αw, absorption class) have been calculated in accordance with standard ISO 11654 (Linea + acoustic complement).

LINEA SCALE CEILING

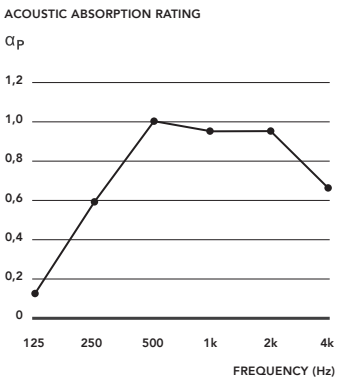
+ 20 mm rockwool on E250 mm plenum



WEIGHTED INDEX:	ABSORPTION CLASS:
$\alpha_w = 0.75$	Class C

LINEA SCALE WALL

+ 20 mm rockwool on E50 mm plenum

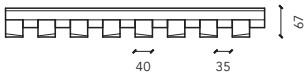


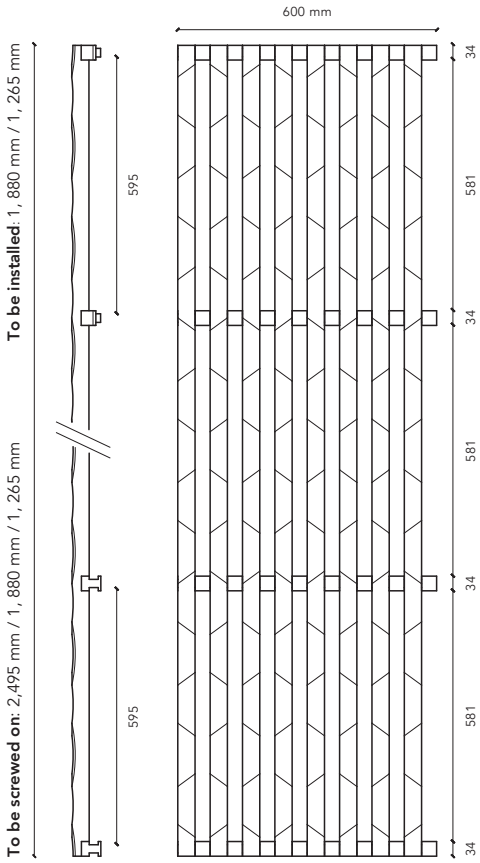
WEIGHTED INDEX:	ABSORPTION CLASS:
$\alpha_w = 0.80$	Class B

The sound absorption has been measured in accordance with standard ISO 354.

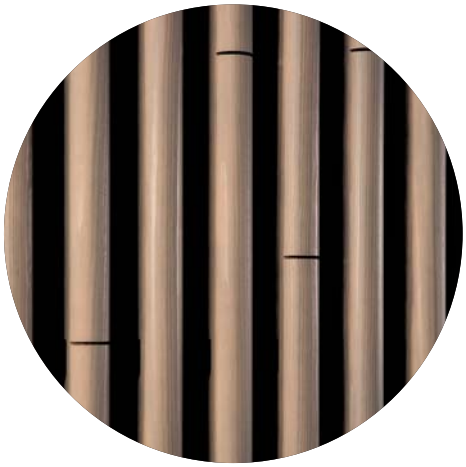
TO BE INSTALLED

TO BE SCREWED ON





Linea Bamboo



For suspended ceiling:

- Panel **TO BE INSTALLED** on T24 frame
- Panel **TO BE SCREWED** onto metal or wooden frame

INSTALLATION:
In accordance with NF EN 13964
In accordance with DTU 58-1

For wall cladding:

- Panel **TO BE SCREWED** onto metal or wooden frame

INSTALLATION:
In accordance with NF EN 14915
In accordance with DTU 36-2

Linea Custom

The art of bespoke design at the service of architecture

At Laudescher, we treat every project as a unique creation. We make it a point of honour to work closely with architects, designers, and project owners to understand their needs and aspirations. This personalised approach enables us to design solutions that are perfectly tailored to their requirements in terms of both design and technical performance.

A trusted partner from start to finish

Laudescher works closely with architectural professionals to bring their creations to life. Our teams support every project at every stage, from initial design to manufacturing, including in-depth technical studies. This collaborative approach ensures optimal adaptation to the specific constraints of each project while guaranteeing a flawless outcome.

Thanks to state-of-the-art tools and recognised expertise, Laudescher can meet the most complex demands, from organic designs to innovative geometric structures.

Laudescher offers a wide range of finishes, colours, and timber species to enhance each project. The acoustic panels in the Linea range, for instance, can be customised to meet the most demanding aesthetic and functional requirements while complying with environmental and technical constraints.

Options and parts

Options and parts

Ceiling

Additional counter-slat	The additional counter-slat provides greater flexibility when cutting panels, allowing you to reconstruct and reuse panel offcuts.	
Additional slat	The additional slat allows you to finish the job with profiles identical to the panels, ensuring a neat finish.	
Bias cutting profile	The profile allows for greater flexibility when cutting panels to perfectly adapt to the project's constraints.	
Edge bracket	The mounting bracket allows you to recreate the edge system on the ceiling panels. Material: 316L stainless steel	
Particle back plate	The particle back plate allows you to make various insertions and perform random cutting, or can be used to seal the plenum while diffusing sound (reverberation).	
Machining option with particle back plate	Ask us!	
Machining option with panel including particle back plate insertion	Ask us!	Finishing option	Finishing for touching up slats or counter-slats.	Varnish, wax colour In 1 litre

Options and parts

Wall

Additional counter-slat	The additional counter-slat provides greater flexibility when cutting panels, allowing you to reconstruct and reuse panel offcuts, 600 mm long.	
Additional slat	The additional slat allows you to finish the job with profiles identical to the panels, ensuring a neat finish.	
Bias cutting profile	The profile allows for greater flexibility when cutting panels to perfectly adapt to project constraints, 2,000 mm long.	
Internal/external angle profile	This profile allows you to manage the finish of wall corners, length 1,879 mm.	
Extension finish profile	This part allows you to finish returns (openings, etc.), length 1,879 mm. 20 x 68 mm 	
	20 x 40 mm  20 x 66 mm 	
Particle back plate	The particle back plate allows you to make various insertions and perform random cutting, or can be used to seal the plenum while diffusing sound (reverberation).	
Machining option with particle back plate	Ask us!	
Machining option with panel including particle back plate insertion	Ask us!	Finishing option	Finishing for touching up slats or counter-slats.	Varnish, wax color In 1 litre

Options and parts

Linea Swell

Additional slat	The additional slat allows you to finish the job with profiles identical to the panels, ensuring a neat finish. (1 slat, 3 assembly brackets + 12 screws, 3.5 x 20 mm).	
Suspension kit*	Suspension kit (2 threaded rods, 1 m, 2 lock nuts and 2 Combifix parts).	
Connection kit*	Kit of 10 connection sets (20 Combifix parts, 10 threaded rods, diameter 6 x 30 mm).	
Assembly bracket*	Kit of 10 assembly brackets + 40 screws measuring 3.5 x 20 mm.	
Particle back plate	The particle back plate allows you to make various insertions and perform random cutting, or can be used to seal the plenum while diffusing sound (reverberation).	
Finishing option	Finishing pot for touching up slats or counter-slats.	Varnish, wax colour In 1 litre

*Humid and/or corrosive environment: ask us.

Timber species & finishes

Timber species*

- Finger-jointed pine
- Silver fir
- Pine
- Oak

Fire-treated finishes

- Colourless
- White
- Douglas fir
- Oak
- White oak
- Honey

Wax color finishes

- White
- Douglas fir
- Oak
- White oak
- Cenza
- Green
- Wenge
- Black

Other colours available on request.

* Clear varnish can be added for sensitive environments.
